Farmers Assn. Meets With Legislators

Funds allocated to the Department of Agriculture by the State have not been earmarked for any specific purpose. The division of those funds is up to the secretary, Senator Edward Kessler told the sixteen members of the Lancaster County Farmers Association attending the luncheon for the local legislators at the Hotel Douglas on Thursday.

Hollis Hatfield, state representative of the Farmers Association outlined the policy of the organization for the benefit of the senator and representatives in attendance The Farmers Association is organized for the purpose of presenting resolutions derived at local meetings to legislators on the state and national levels.

Speaking on behalf of the state group, Hatfield said that the Farmers Association is in favor of the one cent per gallon gasoline tax under consideration at the present time.

The association, which has approximately 500 members in the conty, is affiliated with the American Farm Bureau Federation.

Arrangements for the meeting were made by J. Roy Greider, Mt. Joy R1

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures will average about four degrees below normal for the next 5 days. Normal temperatures for this time of year range from a low of 28 at night to a high of 45 in the afternoon. Cold over the weekend with warmer on Monday. Colder again about Tuesday or Wednesday. Some rain or snow likely again about Monday. Precipitation for the week was slightly over a half inch of mixed snow and rain.

Farm Calendar

February 29—8 00 p.m. Livestock marketing school at Artificial Breeders Building, Landisville.

7.30 p. m.—County FFA meeting at Garden Spot High School, New Holland.

March 1—8:30 a.m. — Market hog show and sale sponsored by the Lancaster County Swine Producers Assn. at the Lancaster Union Stock Yards. Sale begins at 2:30 p m.

10:00 a.m. — Dairy Herd Improvement Assn. workshop on how to use records to best advantage.

Udder Problems Subject Of Letter To Dairymen

Editor's Note: Lancaster County Agent, M. M. Smith has requested that the following letter to dairymen of the county be published.

We are interested in helping you prevent udder problems in your herd through proper HERD MANAGEMENT PRACTICES. PREVENTION IS BETTER THAN ATTEMPTED CURE.

We are listing the following most common causes of udder infection:

MILKING MACHINE: Is the vacuum operated at man ufacturer's directions Is the machine left on the udder too long? Machine stripping will also prevent undue udder irritation.

STALL SIZE: If the stall is too small, udders and teats will be tramped; udders may be injured over the edge of the gutter.

BEDDING· Should be under the udder at all times; bruising and chilling could cause udder problems.

VENTILATION; Drafts ha ve caused many cases of the infection; automatically con trolled electric fan exhaust systems work well.

HEREDITY: No evidence that Mastitis is inherited; however, udder faults such as weak attachments and pendulous shape, appear to be influenced by heredity. Select breeding animals care fully.

FEEDING· Influence of fe eding on udder problems is easily over-emphasized. Low ered resistance may be caused by overfeeding or under feeding of both protein and grain. Forage Testing and a suggested grain ration will reveal this trouble. Abrupt changes in feeding to be avoided.

DRY COW and FRESH COW CARE· Special care at these times is vital; the dry cow should gain weight without getting too fat; keep protein levels high; treat on ly cows that have had udder inflamation. Keep udder con gestion to a minimum in the fresh cow; provide proper stall, well bedded, prevent chilling and udder injury.

LOOSE HOUSING· Is not necessarily the cure for udder trouble; udder injury, dampness, drafts, and chilling may still cause the trouble Extra bedding and car ful management is still important.

We ask that you study th above points and observe how they are being handled in your herd Additional information and bulletins are available

You are urged to comply with requests regarding the use of antibodies THIS PROGRAM WARRANTS YOUR COOPERATION! ! !

M. M. Smith,
County Agricultural Agent

LITTLE FARMERETTE VICKIE ANDERSON is a pert reminder that National Egg Month will be observed nationally throughout the month of March. The big promotion is sponsored by the Poultry and Egg National Board. The coast-to-coast publicity campaign will utilize newspapers, magazines, radio and television, tie-ins, proclamations by governors and other government officials, and point-of-sale materiols. Also cooperating in the promotion are the U. S. Department of Agriculture, state extension personnel, and many other agricultural food and business groups.

Local Men Go To Co-op Convention

Each year, every distribution station of Eastern States Farmers' Exchange elects one member to attend the cooperatives's annual meeting in Springfield, Mass., and to become one of its own advisory committeemen for three years.

At a mail ballot this winter, members of the station at Bird-in-Hand elected Amos G. Ranck, Strasburg, for this honor. They named John E Kreider, Lancaster, and Harry M. Landis, Lancaster, as first and second alternates, one of which will attend the 1960 annual meeting if the elected member is unable to The meeting this year will be March 4-5 at Springfield, Mass.

The cooperative pays the expenses of the elected mem ber or, if he is unable to attend, for one alternate. This election and expense payment is to make sure that every station is represented at the annual meeting of this nine-state farmer-owned cooperative, explains Enos R Buckwalter, Lancaster, local Eastern States representative. Of course, any member may attend and participate in the annual meeting, he states.

The Eastern States annual meeting is one of the largest agricultural conventions in the East. More than 1000 farmer-members from New England, Pennsylvania, Dela ware and Maryland will attend. Eastern States was incorporated in Massachusetts and must by law hold its annual meetings there.

Dean Hoffer, of Manheim will be a special guest at

At Lancaster Yards

Trading Slow, Prices Up

James E. O'Hara,
In Charge, Market News Branch

CATTLE. The supply includes about 45 percent of slaughter steers and 45 percent stockers and feeders. Receipts will total about 3,700 head or 1000 head more than last week. The quality of slaughter steers was about the same as last week.

Trading was slow on slaughter steers but moderately active on all other classes. Compared with last week's close, slaughter steers were 25 to mostly 50 higher Cows fully steady. Bulls held steady. Stockers and feeders were steady, spots strong on weights under 550 lbs.

Choice grade slaughter steers weighing 1350 lbs. sold 26 50-28 50, load of high Choice 1181 lbs. 28 75, two loads 1333-1336 lb. high Choice and Prime commanded 29 00-29.25. Good to low Choice made 24.00 26 75. A few lots Good and Choice heifers ranged from 22 00-25 Cutter & Utility cows made 1575-1800 and Commercial cows sold up to 18.75, while Canners and low Cutters made 14 00-15 75.

Utility and Commercial bulls brought 20.00-23.50, with Good grade fed bulls selling up to 26.00. Medium and Good 800-1050 lb. feeder steers brought 21 50-25 50 and few lots Good grade to 26.00. Good and Choice 550 800 lb stock steers made 24-75-28 00 and Medium & Good sold at 22.50-25 50. Good and Choice stock calves brought 27.00-32 00

CALVES: Trading moderately active. Vealers, compared with last week, were steady to strong. Receipts will total about 700 head compared with 539 head last week. Good and Choice vealers made 30.00-38 00 with Choice and Prime at 39.00-42.00, few early in the week to 44 00, Standard and low Good 23.00-29,, Utility sold down to 18.00.

HOGS. Receipts will total about 1625 head compared with 1533 head last week Trading was moderately active. Barrows and gilts sold steady to 50 higher, mostly 25.50 up. Sows were steady U. S. 1-3 grade 190-230 lb. barrows and gilts made 14.75-15 50, few lots No. 3 grade sold down to 14 50 Hogs more uniform for weight and grade including 1-2 grade 190-220 lbs ranged from 15-75-16 50, a few lots mostly No. 1, sold at 17.00 230-250 lb butchers made 14 00-14 50 300-600 lb sows brought 8.00-11 00.

Development of "hinkleburgers" or "henburgers," in literal translation from the Pennsylvania Dutch, may open up new market possibilities for the broiler producer, reports Paul H Margolf, poultry researcher at the Penna. State University.

Chicago Cattle

Prices Highest Since July 15

CATTLE —Local receipts reduced 7 per cent and the smallest for any week since August excluding Christmas week. Curtailment in supplies due in part to inclement weather and resulting hazardious road conditions over much of the midwest as well as to the non-slaughtering holiday Monday of this week.

Consist of receipts little changed with a short 75 per cent slaughter steers, fully 15 per cent heifers and about 6 per cent cows Stockers and feeders very scarce.

Percentage prime in slaughter steer supply little changed from 11 per cent of last week.

Good to prime slaughter steers 50 cents to 1 25 higher Weights over 1300 lbs. at full advance and some of these 1.50 higher, Standard and below steady to weak. Vealers steady, stockers and feeders steady to 50 cents higher.

Load prime 1284 lb steers 30.50 highest here since July 15 and these mates of 29 75 cattle last week; Bulk prime steers 1100-1400 lbs. 29 25-30 00. Bulk mixed choice and prime steers 1400 lbs down 28.50-29.25 Few loads high choice 1150 lbs. down up to 28 75 late; Load mixed choice and prime 1550 lbs 27. Bulk choice

(Turn to page 5)

New Holland

Slaughter Steers Higher

Slaughter steers continued to gain some strength at the New Holland market this week with gains of 50 to$1 on weights over 1300 lbs Cows and bulls held fully steady but vealers lost most of the gain of last week.

Receipts at the February 25 sale were 1075 cattle and 295 calves.

Choice and prime slaughter steers at 945 to 1,485 lb. wgts - $29-29 50. Choice slaughter steers made $27 25-29 Good to low choice $24-27 50

Good grade heifers $21 50 to 24.60. Cutter and utility cows $16-18 25, few to 18.75 Canners and low cutters — 14-16 25.

Utility and commercial bulls $20 50-24, few good grade fed bulls made $26.25

Few lots good and choice 720-1 018 lb. feeding steers $25.85-26 75.

Vealers were 1 to 2 lower with most of the decline on choice and prime grades Good and choice vealers $30-37, choice and prime $37-40 with a few at $43. Standard and low good at 23-30 with utility down to $19.

The February 24 dairy cattle sale had receipts of 111 cows, 5 stock bulls and 20 heifers Dairy cows sold very draggy except for fleshy Holsteins.

Fresh cows - Holsteins $350-440, Guernsey - $200-275, others - $200-310

Stock bulls - $110-170 stock heifers - $75-140

The February 22 horse sale had receipts of 230 head with a heavy run of mules The market was steady on draft horses and killers with mules slow and weak Saddle horses strong and

EARLY BIRD

Restricted Feeding of Replacement Pullets

by RALPH C. HOLDER, Nutritionist

We hear a great deal about restricted feeding programs. All growing pullets, including light medium, and heavy strains, must be restricted

The question is how much restriction is necessary and how can it best be accomplished We have by experience a ready answer.

Because oats are one-third fiber, which is not digestible by poultry, increasing the amount of oats in the ration reduced the rate of growth and deposition of fat

Feeding 50% oats with Early Bird Growing Mash in confinement or 60% on range most definitely restricts the growth of pullets, such that they are in PROPER CONDITION when put in the laying house.

NOTE: Early Bird #41 All Mash Developer is similar in nutrition value to a ration of 60% oats and 40% Early Bird Growing Mash.

OVER restriction results in **UNDER** developed birds that must complete their growth later in the laying house.

As stated above 19 pounds of total feed is adequate to grow a Leghorn pullet. If **EXCESSIVE AMOUNTS** of indigestible fibrous materials are incorporated in a growing ration, feed requirements are greatly increased and increased production costs defeat such a program.

The Early Bird program is a proven economical and highly efficient program which will produce pullets capable of **HIGH AND SUSTAINED EGG PRODUCTION** at low costs.

Your **FUTURE** egg production costs and your flocks **PERFORMANCE** will be determined by the way you feed and manage your replacement stock **NOW.**

Don't be penny wise and pound foolish! Do it right!

Delmarva - Georgia

Higher Prices Noted Here

Delmarva reported sales of 779,500 head at farm prices of 18 20 - 20.60 for the 24 hour period ending 10:30 Friday morning.

Estimated slaughter in Delmarva for the week end is 610,000 head compared to 509,000 head last week end.

The Delmarva broiler feed ratio for the week ending February 19 was up one point from the previous week at 4.0. Broilers averaged 18.18 cents per pound and mash cost $92 00 per ton.

Georgia reported sales of 1,346,000 head at prices ranging from 18 to 19.

Fluid Milk

Surplus Still Building Up

Production of fluid milk was reported sharply higher than for the same period of last year at all points except Atlanta. Only slight increases were noted over last wk. Bottling demand was irregular with higher cheese production. Prices at New York unchanged at $5 32 per 40 quart unit.

FROM WHERE WE STAND -

Beauty Is Its Own Excuse For Being

Ralph Waldo Emerson, in his beautiful poem "The Rhodora", says, "If eyes were made for seeing, then beauty is its own excuse for being."

We have been bludgeoned so long and so hard by the efficiency experts and the pragmatists that we sometimes tend to forget that a thing may have some intrinsic value even though it will never 'make a buck' for its owner.

The standard rule by which we have been taught to measure is, "Will it make more money for me or will it do the same job with less work."

We have no quarrel with efficiency. We believe that mechanization of agriculture and the advent of modern labor-saving devices on farms have liberated the farmer from a life of servitude to the soil.

We do believe, however; that an object to be functional does not necessarily need to be ugly.

Our quarrel comes with those people who feel the need to sacrifice all asthetic values for the sake of imagined efficiency.

Futhermore, we feel that the cause of conservation of our resources, both natural and human, is being sold short in the name of efficiency by the direct approach of some of the advocates of the trim look at all costs.

We think specifically of the farmer who likes to be able to mow his pasture completely. He chops down all the willow bushes along the streams so that they will not interfere with the operation. He can then mow the pasture but in a few years he starts to worry about the erosion of his stream banks and the loss of fish in the stream. The fish left when the shade was gone and the temperature of the water went up.

Another case in point is the farmer who likes to see nice clean fence rows. We do not object to clean fence rows, but game conservationists will tell you that one of the quickest ways to destroy wildlife populations is to destroy their avenues of travel and covered lanes from one refuge to another.

One of the most obvious cases of the clean look on many Lancaster Co. farms is at the end of a field abutting on a public road. Many farmers feel that they must plow right out to the very edge of the road, sometimes plowing up the berm, in order to avoid any waste land.

Conservationists know that soil from such fields pollutes the streams and rivers in addition to being a driving hazard on the highways onto which it spills after every rain.

We carry the idea of the slick look over into the home too. We are so conscious of the cracks and crevices in which germs might be hiding that furniture is made so slick one has to be quite agile just to stay on top of it.

We are not calling for a retreat from progress. We would simply like to suggest that in our mad rush to efficiency we do not bury beauty in the antiseptic dust.

At least that's how it looks from where we stand.

LIVESTOCK

Livestock are animals that are bred and raised in the country to keep the farmers broke and the buyer crazy They are born in the spring, mortgaged in the summer, pasteurized in the fall, and given away in the winter. They vary in size, color, weight and the man who guesses their nearest weight and market grade is called a "livestock buyer" by the public, a robber by the farmer, a poor risk by the banker, and a "bologna peddler" by Mrs O'Brien. The price of livestock is usually set at the Chicago stockyards and invariably goes up after you have sold and down when you hold. When you have light ones, they want heavy and when you have cattle you find they want sheep, or vice versa. If you have steers they want bulls if you have cows they want heifers. If you have calves they say they are running a special on veal. When they are thin the top price is for the fat and when they are fat you are told that the tallow market is now shot to hell. Twenty years ago I swore I'd quit the business then and there but here we are with a lot of critters depending on us to sell them to someone.

—Ivanhoe (Min.) Times

Davidson

THIS WEEK
—In Washington
With Clinton Davidson

When is a Judge?

Several months ago we called attention to the fact that members of government agencies frequently sit as judges in important cases without observing judicial procedures required under the Constitution.

We pointed out that if members of those so-called "independent" agencies are to exercise judicial powers granted them by Congress they should be subject to the sames rules as judges in an established court of law

This view was re-emphasized recently when Louis J Hector resigned as a member of the Civil Aeronautics Board and wrote President Eisenhower that it is absolutely necessary for board members and commissioners, in determining policy, to discuss the subject before them with all interested parties.

In mny cases a government agency investigator first examines, under oath, the defendant who is not permitted to have his stenographer present or to secure a copy of the testimony

Kangaroo Court

The prosecu or (investigator) then se ects from the testimony whatever he wishes in preparing a summary and presents his version of the interrogation to the board members. The members then may invite the defendant in for a conference or, in some cases, thy may decide against him without a conference

After the defendant has stated his side of the case, the prosecutor meets the agency board, or with its chairman (the defendant being excluded), and argues against the points made by the defendent The defendant cannot confer with the board or its chairman during the time the case is pending because "he must treat them as judges." The prosecutor, however, does not act as if the board members were judges.

Former Justice of the Supreme Court of Florida, B. K. Roberts, wrote us about an impeachment trial "where the defendant's office, emoluments and personal reputation were at stake."

"The testimony." he wrote, "was introduced over a period of weeks, and even when a quorum was present many of the members were reading newspapers or were otherwise inattentive. Yet, when the roll was called, all of the members voted."

Rule by Divine Right

Judge Roberts went on to comment that if members of a jury should leave the box while evidence was being presented the entire proceedings would be illegal and the trial a nullity.

C. Frederick Meyer; a Midwestern financier, wrote in regard to the column: "During virtually all of the years of recorded history it was commonly accepted that the emperor, king or priest, ruled by divine right.

"It was not until the 18th century that a small group of men in the American colonies, dedicated to the principle of personal and economic liberty for the individual, devised a system of government in which all powers rested in the hands of the people with the exception of those that were specifically set forth in the original constitution.

"While it is true that the American people during the past 180 years have unwittingly surrendered many of these powers to the Federal government, the philosophical concept within which the structure of our government was organized must necessarily govern our administrative agencies if we are to remain

Good Soldiers

Lesson for February 28, 1960

MAYBE too much is said about the peace and joy of the Christian life. Peace and joy there are, to be sure; but hearing about nothing else may give interested persons the notion that being a Christian is just like floating on your back in a sunlit swimming pool, half asleep. On the contrary, the Christian life is more like a swim across the English channel, fighting current, waves, cold and hunger. If you're not prepared to swim against the tide, you'll never make it. Saint Paul more than once used language about the Christian life that make it sound like a fight. He compares it to a race (2 Tim 4:7), to a boxing match (same verse), to a wrestling match (Eph. 6:12), to a war (Eph. 6:10f), to a battle with wild beasts (1 Cor. 15:32). He urges his young friend Timothy, who was a bit of a mother's-boy, to take his share of suffering like a good soldier of Jesus.

Dr. Foreman

Where the Fight Starts

If this world were the kind of place that would give no trouble at all to a real Christian, it would not be the world that needed to be "saved." It is precisely because the world does not welcome 100% Christians that it did not welcome Jesus; it is definitely the hostility of the world that brought Christ here to endure the Cross.

Jesus did not go around picking on the world, and the Christian has no business picking on it, either. The way to be a good soldier of Jesus is not, usually, to start firing at will. There is enough fighting to be done without picking fights.

Consider the story of Paul's arrest at Jerusalem. It wasn't exactly arrest, it was being taken into protective custody to keep beaten to death by a ly mob. What caused Slander caused it, for Paul was accused of s filing the Holy Place, w not done at all. Preju it, including race pre was accused, truthfull being friendly with Ge were other factors, but can see the kind of ca always be found back to Christians: Accusati Paul was innocent, an the very thing he di good. The Christian w be misunderstood, but he is fully understood be a target for broke

Enduring

There is one very im ference between Chri fare" and literal war a in the modern world other soldier at the fr deadly weapon. He go enemy by bringing hi catastrophe, he destro can. The Christian so on his war by turning (of God) into a friend not by inflicting suffe enduring it. Paul being that insane mob was back. He would not ha he could He wrote to he carried the "marks Jesus" about with h meant literal scars Re says about his trials i 23-28.

Witnessing

The other way the C dier fights is by simply It is an impressive sigh his clothes torn, hims and in fact half dead, l like an Egyptian ba Roman citizen, quieting with a gesture, and t own language telling how he became a Chri took courage. It was r ing a Christian that trouble. But this is w not tone down or deny tian warfare is by with no one say this is all ta is cheap and easy, tha going to lynch you i Christian in America it true, disgracefully many Christians keep it? Stones are not th but laughter is. Don't dread ridicule almost a gun be?

Based on outlines co Division of Chris nal Council of the t on the U. S. A. munity Press Service

Now Is The Time . . .

BY MAX SMITH

MAX SMI

TO CONSIDER HEREDITY IN BREEDING—many animals are ou g becaue i nherited charact from their dam or sire Diseases a inherited but the weaknesses that e resist e to a disease are in Strong udder attachments are very t in a w ws; bag shaped dulous udders are objectionable he e y and calv s from cows should not be considered for ure herd.

TO GIVE SPECIAL CARE TO SMALL CALVES calves of today are the milking herd of the future T of care and attention is not too good for them. The should be clean, dry, well bedded and free from Poor ventilation and drafts will bring about scours monia, and unthrifty calves. In most barns the ven fan should be located near the calves in order to more warmth for them.

TO TEST SOIL FOR CALCIUM AND MAGNESIUM Soil Testing Services at Penn State now include available calcium and magnesium; these two trace el may be checked in any soil sample by paying an add 50c for each test at the time the soil envelope is pur The cost of the original soil test for lime, phospho tash, and organic matter remains at the same $1 00

TO PROVIDE PROTEIN FOR BROOD SOWS—Some producers have learned that quality hay and silage fed to the breeding herd prior to farrowing time i to cut feed costs. This has worked well providing tion is supplemented with one pound or more of supplement per sow per day. Both corn silage and silage may be used for this purpose Free access to eral mixture should also be provided for the breedin

Support Price Is Lower Than Market Value On Some Commodities

Acting Secretary of Agriculture True D. Morse reported that current market prices for half of the farm products for which price supports are provided are above the support levels. This has resulted in a substantial lessening in the use of price supports thus for during the current season.

"With an expanding economy, growing employment and higher consumer incomes, as well as other factors, markets rather than government price supports are setting the prices which farmers are receiving on several crops, at levels above the supports," acting secretary Morse said.

Mr Morse also pointed out that, "This is the period of seasonally large marketings of many farm products, following harvest, and consequently the season when prices usually are at the lowest levels of the year"

Of the more than 250 agricultural products, only 21 receive price supports Existing farm legislation requires the Department to give price support to 16 of these commodities, and support for the five other products is authorized by law.

The Department's recent report on Agricultural Prices, which reflected prices received by farmers as of mid-Nov. showed that farmers' prices for around one half of the supported crops were moderately to substantially higher than their support levels. The markets for some of the other supported crops were slightly above supports.

The stronger-than-support market for the several crops and products has been reflected in substantially reduced support activity during the current season. Quantities of 1959 crops placed under support thus far this year are generally running below the quantity of 1958 crops placed under support loans in the same period last year.

Corn and cotton are two major exceptions to the general decrease in price-support volume Cotton is supported under a new program enacted by Congress in 1958 which involves purchase by the Commodity Credit Corporation of a major portion of the crop for resale at reduced prices. Due to abnormally favorable weather and other factors, corn production for 1959 is at an all-time record

Reduced 1959 crop production from the 1958 level is a price strengthening factor in some instances, particularly wheat, feed grains other than corn, and flaxseed.

"Farmers, this year, shifted some acreage out of crops like soybeans and oats into corn," Morse said. "More normal acreages are expected to be planted by farmers next year—the second year of the new corn program."

BE SURE OF SEED

The blue tag of certification indicates pure, high-quality seed of an indetified variety, reports Clarence Bryner, Penn Stte extension agronomist He says that with certified seed the original breeder is known, and certified seed crops are inspected in the field and laboratory to ensure high quality.

Meat For Energy

by Mrs. Richard C. Spence

We need plenty of protein these cold winter days and meat is just the food to provide it. It is a good thing to know that it is not always the most expensive cut of meat that provides the best in food value. Most of the less-expensive pieces of meat can be dressed up or combined with other foods to make as vitamin-rich a dish as you'll need for your family—and be mighty tasty too. Take for instance, the following recipe:

NEAR EAST MEATBALLS

1 pound ground beef
¼ cup fine dry bread crumbs
2 tablespoons milk
¼ teaspoon salt
2 tablespoons shortening
1 can (4 ounces) sliced mushrooms
1 can (1¾ ounces) condensed onion soup
1 cup water
½ cup rice

Combine ground beef, bread crumbs, milk and salt. Shape into 18 meatballs; set aside Preheat covered electric skillet to 340 degrees. Melt shortening. Brown meatballs and mushrooms, drained. Reduce temperature to 250 - 260 degrees. Drain off excess fat. Pour in onion soup and water. When boiling starts, slowly add the rice, making sure it is covered by liquid. Cover; boil gently about 25 minutes or until rice is tender. Stir now and then. Makes 6 servings.

* * *

HAMBURGER STROGANOFF

¼ cup butter
½ cup chopped onion
1 pound ground beef
1 clove garlic, minced
2 tablespoons flour
¼ teaspoon monosodium glutamate
¼ teaspoon paprika
1 pound fresh mushrooms, sliced
1 can condensed cream of chicken soup
1 cup sour cream

Saute onion in butter. Stir in ground beef, garlic, flour monosodium glutamate, pepper, paprika and mushroom saute 5 minutes Add unlliluted soup Simmer 10 minutes. Stir in sour cream. To serve, spoon over triscuit wafers. Serves 4 to 6.

* * *

ROLLED MEATLOAF WITH BLEU CHEESE STUFFING

1 pound lean ground beef
½ teaspoon salt
⅛ teaspoon pepper
¼ cup finely chopped onion
1 egg, lightly beaten
2 tablespoons butter or margarine, melted
4-ounce can mushrooms, drained and chopped
2 tablespoons crumbled bleu cheese
6¼ ounce package bleu cheese crackers, finely rolled (about 2 cups of crumbs.)

Mix together first five ingredients. Shape on wax paper into a rectangle about 9x7 inches and about one inch thick. Blend together remaining ingredients for stuffing. Heap stuffing in center of meat and spread to edges. Using wax paper roll meat over stuffing and seal by patting meat together at top and ends. Remove paper and bake in shallow pan in moderate oven (350 degrees) 40 minutes Serve 4.

* * *

Although stew meats still need long slow cooking to develop tenderness and flavor, there are many short cuts with modern foods that will reduce the time in the kitchen. Paring and chopping of vegetabdes and the fear of lumpy gravy have been reduced to a minimum for the following recipes take advantage of canned and frozen vegetables and soup

oes
up water
teaspoons salt
easpoon pepper
easpoon chili powder
ay leaf
ounce package frozen
otash
ounce package frozen
and carrots
nce can mushroom
es (optional)
½ cup uncooked macaroni pieces
1 tablespoon cornstarch
2 tablespoons water

Melt fat in a large kettle. Add meat and brown well on all sides. Stir in onion and celery and brown. Add tomatoes, water, salt, pepper, chili powder and bay leaf Cover and simmer 2 hours. Add vegetables and macaroni. Cover and simmer about 30 minutes longer, or until meat is tender and vegetables and macaroni are done. To thicken broth, stir into stew 1 table spoon cornstarch mixed with 2 tablespoons water. Cook and stir over low heat until broth is clear and thick ened.

* * *

SPICY BROWN BEEF STEW

2 pounds beef stew meat, cut into 2-inch cubes
⅓ cup flour
3 tablespoons fat
1½ teaspoons salt
½ teaspoon celery salt
¼ teaspoon dry thyme
1 small clove garlic, finely chopped
2 cups water
2 teaspoons Worcestershire sauce
2 tablespoons catsup
6 whole cloves
1 pound can onions
10 ounce package frozen peas and carrots
1 pound can potatoes

Coat meat on all sides with flour. Save extra flour. Melt fat in a heavy kettle. Add meat and brown well on all sides. Remove browned meat from kettle. Sprinkle salt, celery salt, thyme, garlic, and extra flour into kette with fat. stirring to make smooth paste. Gradually add water, stirring constantly until gravy is smooth and thickened.

Stir in Worcestershire sauce and catsup. Return browned meat to kettle with gravy. Cover and cook over low heat on top of range or in a moderate oven (350 degrees) 2 hours. Stick whole cloves into onions. Add onions, carrots, and potatoes to kettle. Cover and continue cooking about 30 minutes or until meat is fork-tender.

* * *

Sliced frankfurters and macaroni combine with a pleasingly spicy mustard sauce in this tasty casserole Saucy-Frank-Bake. Prepare this casserole in the morning and refrigerate. It can be baked in a hurry, and it's easy on the budget too.

1 pound frankfurters
5 slices crisp bacon, crumbled

Add 4 teaspoons salt and macaroni to 1½ quarts boiling water. Boil rapidly, stirring constantly, for 2 minutes. Cover, remove from heat, and let stand 10 minutes. Meanwhile, prepare mustard sauce by melting butter or margarine in large saucepan. Blend in flour, sugar and dry mustard.

Dissolve bullion cubes in water. Mix with milk and vinegar. Add liquid mixture gradually and cook until thickened, stirring constantly. Blend in prepared mustard and horseradish. Rinse macaroni with warm water and drain well. Cut frankfurters into ½-inch slices. Add frankfurters and macaroni to Mustard Sauce. Turn mixture into large casserole or baking dish. Sprinkled crumbed bacon over casserole Bake in moderate oven (350 degrees) about 25 minutes. Makes 4 servings.

* * *

CROWN ROAST OF FRANK

4 cups saltine cracker crumbs
½ cup melted butter or margarine
1 can sauerkraut, drained
1½ cups diced apple
2 teaspoons caraway seeds
1½ pounds frankfurters

Mix together cracker crumbs, butter, sauerkraut, apple and caraway seeds. Shape into mound on baking pan. Stand frankfurters around stuffing, joining with cocktail picks near top. Bake in moderate oven (375 degrees) 40 minutes, Serves 6 to 8.

* * *

CHIPPED BEEF AND NOODLE CASSEROLE

8 ounces medium noodles
3 tablespoons butter or margarine
½ cup finely chopped onion
2½ cups condensed cream of mushroom soup (two 10½ ounce cans)
2 cups milk
8 ounces chipped beef
⅓ cup enriched bread crumbs
⅓ cup grated American cheese

Cook noodles. Meanwhile, melt butter or margarine in large saucepan. Add onion and cook over low heat about 5 minutes. Stir in soup, milk and pepper Heat thoroughly. Rinse noodles with water and drain well. Cut chipped beef into pieces Stir into sauce with noodles Turn mixture into greased 2-quart casserole Bake in moderate oven (375 degrees) 20 to 25 minutes. Makes 4 to 6 servings.

* * *

BAKED YANKEE HASH

Combine 1 can (10¾ ozs) beef gravy, 2 cups ground cooked beef, 1 cup finely diced cooked potato, 1 small onion, ground, ½ green pepper, ground ½ teaspoon prepared mustard,, & dash black pepper. Spoon into a 10x6x2 inch baking pan. Bake in moderate oven (350 degrees) 1 hour. Serve with chili sauce, if desired. Makes 4 to 6 servings.

BUY CORRECT SIZE UNDERWEAR

Buying men's and underwear in the size adds to comfort an ability, reminds Thelm ert, Penn State ex clothing specialist. If wear is too small, bind and soon stretch tear. If it's too large, wrinkle and be bulky outer clothing. Unde should come down ov hips and shorts should a firm elastic waistba least one inch wide

At World Agr. Fair

Indians See American Indians

Visitors to the United States Exhibit at the first World Agriculture Fair in New Delhi, India, pay entrance fees a second, third, and even fourth time to come back and talk with "the real American Indians".

Indians and other Asiatic people attending the fair are searching for a common bond with Mr. and Mrs Fred Kabotie, of Oraibi, Ariz. The Hopi Indian couple are from the Shaunjopavy reservation northeast of Flagstaff, Ariz.

The handicraft exhibit is one of several outdoor displays in the county fair area of the American pavilion. S Exhibit attracts daily Opened by President Eisenhower Dec. 11, 1959, the U. crowds of 60,000 to 80,000 Its heavy attendance, observers report, is due in part to the vast array of machinery, livestock, equipment and demonstration models which trace the growth of American agriculture through the past century. Still more important, they feel is the appeal of Americans manning various parts of the show.

"The Kabotles," Said James H. McCormick, deputy general manager of the fair, "have turned into good-will ambassadors for the Hopi Indians as well as for the entire United States."

A farmer from Punjab, the richest farming State in India, returned 100 miles to the fair grounds to present the Kaboties with a steel pointed arrow.

"The arrow" said Mr. Kabotie, who teaches art and handicrafts at the five Hopi Reservations in Arizona, "is similar to the kind of arrow our foreftathers used to make."

The ambassador from Thialand brought them a specially prepared Siamese dinner by camel-back Anthropology professor returned to invite the couple to lecture at a class.

Several strangers have asked them home to dinner. Sometimes people return with baskets full of Indian foods. They bring dried fish and fish curries, vegetables cooked with herbs, and candy made of rice.

Children stop by the booth to ask Kaboties: "Where are your war bonnets?" A local comic strip printed daily in one of the newspapers on American Indians accounts for a lot of these comments

"Some people find it hard to believe when we tell them our tribe is a peaceful one, and we do not fight", said Mrs. Kabotie, whose grandfather was chief of the Hopi tribe.

"Everyone is so friendly and warm," Mrs. Kabotie said "they make us feel so comfortable—as if we were at home."

A total of 55 exhibits make up the 5½-acre American pavilion Exhibits show how research, conservation, education and communication have created America's great agricultural productivity. Farm implements of Colonial America create a sharp contrast to farm implements used today on American farms.

Winter pasture, such as bluegrass, brome, fescue, rye or wheat supplies excellent feed for ewes during the fall and winter.

Heifers Harmed By Substance In Silage

Dairy heifers eat sparingly and grow slowly when fed silage made from freshly chopped unwilted grass-legume mixtures, presumably because some unidentified organic compound formed during fermentation of silage decreases the appetite of the animal U S Department of Agriculture scientists report

Lane A Moore and J William Thomas of USDA'S Agricultural Research Center at Beltsville, Md, say isolation of this compound may make unwilted grass-legume silage as valuable as hay for feeding dairy animals. The compound also affects the appetite of mature cows causing a decrease in milk production in some cases, but the effect is more marked in growing heifers

Until more information is obtained, they suggest that farmers wilt their crop a few hours before ensiling, even though this involves mowing before chopping The scientists found that heifers consumed about twice as much dry matter eating wilted silage as they did eating unwilted silage In fact, there was little difference between consumption of heavily wilted silage and hay If silage is not wilted, some hay should be included in the ration, the scientists recommended

Recent research showed reduced consumption of dry matter was not the result of excess water in the unwilted silage at feeding time. When water was added to hay before feeding to make it equal in moisture content to unwilted silage, or when the water content of silage was reduced or increased, the same amount of dry matter was consumed

Scientists then thought palatability might be the answer, because when heifers were fed hay soaked in silo seepage, their food consumption decreased. However, when seepage was introduced directly into the stomachs appetites also lessened. This proved taste was not the fac for causing reduced consumption.

Use of unwilted silage advantageous in the hu east during early summ when heavy rains make difficult to produce high lity hay without drying uipment

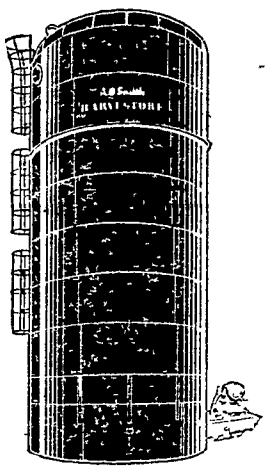
INTERCOURSE, PA. PH: SO 8-3501

"Our feed cost per 100 pounds of milk dropped to $1.43 on HARVESTORE Haylage"



...says Gene Ringgenberg Pierceton, Indiana

Gene Ringgenberg feeds Haylage from his two 20x50 HARVESTORES—delivered direct from his HARVESTORE Bottom Unloader to his Feed Lot Mechanical Feeder. He stores his complete grain ration for the entire year in his 17x40 HARVESTORE, which delivers it into a conveyor leading directly to his milking parlor mangers.

This complete HARVESTORE grain *and* forage feeding program cut his feed cost, including *both* home grown and purchased feeds to $1.43 per 100 weight of milk.

PROOF OF EXTRA HARVESTORE EARNING POWER

Ringgenberg's 60 Holsteins liked Haylage so well they ate more than he expected—so he ran out of it for a while and had to go back to baled hay and silage. Here's where he PROVED the value of Haylage! His feed costs shot up to $2.11 per CWT—68c *more* than on Haylage.

On an average of 10,000 lb. milk per cow, annual savings per cow on Haylage are . . $ 68.00

On a 50-cow herd, this means an annual saving of $3400.00

Contaminated Water Can Effect Your Farm Income

Lancaster, Pa — Disinfecting water is of utmost importance because the removal of disease producing organisms from water is a prime prerequisite for its safe use

And chlorination offers the most dependable method of disinfecting water, says the Joint Committee on Rural Sanitation, U S Dept. of Health, Education and Welfare.

Crops irrigated by water containing sewage pollution may transmit disease Waters carrying industrial pollution such as chemical wastes, can damage the crops they irrigate, says U S Dept. of Health The crease in use of supplemental irrigation in the East raised questions of qual of water. Many natu streams formerly relied to provide water for l stock have become so ted that their continued is unsafe

Water can be sparkl clear to the eye, and t good, yet swarm with th deadly bacteria, nor is m ly a deep well the answ

Only the proper use chlorination and dechlor tion device according Clift Lehman, can pro constant and continuous p tection against the dan of water borne diseas

=★= LETTERS To The Editor

Dear Sir:

Many thanks for the splendid coverage of our Annual Stockholders Meeting made possible through the efforts of the LANCASTER FARMING STAFF.

My personal thanks to you . . . for the very fine news copy and picture.

The farmers of Lancaster County, as well as the farm organizations, are fortunate indeed to have a newspaper such as the LANCASTER FARMING devoted to full farm news coverage.

Sincerely yours,
John E. Wolgemuth
Assistant General Manager and Sales Manager Lanc Co. Farm Bureau Co-op Assn

---

Dear Sir

I enclose a check for two dollars for the LANCASTER FARMING for another year We certainly enjoy your paper, look forward each week for it, would not be without it

Yours Truly,
Harry H Yerkes
Oxford, Pa.

When you feed

Be-Co-Nurse MILK REPLACER

- HIGH IN MILK SOLIDS
- FORTIFIED WITH ALL NEEDED VITAMINS AND MINERALS

It is often said that Beacon Be-Co-Nurse gives calves "everything but mother love." This high-quality milk replacer is the first step in the Beacon feeding program for better herd replacements. It allows you to market more milk, get bigger milk checks, and still supply all needed nutritional requirements for growing calves to develop big frames, strong bones and smooth hair coats.

Advantages of Be-Co-Nurse

Be-Co-Nurse is carefully formulated, using a high proportion of dairy products (90% milk solids) which provide the natural balance of amino acids found in whole milk. It contains no cereal proteins or high-fiber ingredients. Fortified with necessary vitamins and minerals, Be-Co-Nurse contains a controlled amount of fat for energy, as well as Aureomycin for improved growth and protection against scours. Be-Co-Nurse stays in solution—the calf gets it all.

Check How Much You Save

One 25-lb. bag of economical Be-Co-Nurse replaces 225 lbs. of whole milk and is usually adequate for the average calf. To estimate how much Be-Co-Nurse can save you, check the table below.

When milk prices are:	$4 50 cwt	$5 00 cwt	$5 50 cwt	$6 00 cwt.
Be-Co-Nurse can save you, per calf.	$5 08	$6 20	$7 33	$8 45

FREE LITERATURE. For better calves, able to produce to inherited capacity, follow the Beacon feeding program, including Be-Co-Nurse and Beacon Calf Grow. Ask your Beacon Feed Dealer or Beacon Advisor for the free Beacon Dairy Calf "Tells How" Feeding Guide, and the new 10th edition of "Profitable Dairy Management"—190 pages of practical dairying information, including a detailed section on milk replacers and raising calves more profitably.
